Stormwater

Stormwater Management!

Water from rain or snow storms, known as stormwater, flows from streets, driveways, backyards, and parking lots into our storm drains. Stormwater runoff is often worsened by human activities, and can contain pollutants such as oil, antifreeze, detergents, pesticides, fertilizer, and pet waste. The City of Goddard Public Works Department works to ensure that our parks are clean, and grates are clear prior to, during, and after storm events. To report suspected stormwater pollution problems, please contact the Public Works department at 316-794-3801. For more information regarding stormwater management, please visit the City of Goddard website and see the Stormwater Management page.
