## Winter Weather

### Preparation and Response

#### City's Response to Winter Weather

The following provides an overview of the City of Goddard's response to winter weather conditions. Our Public Works Department is ready to respond 24 hours a day, 7 days a week to treat or plow ice, slush, and snow. During a winter storm event these tasks take precedent over all non-emergency City operations. City staff consults with meteorologists and monitor weather forecasts to establish a work plan to minimize a storm's impact on our community. In anticipation of winter weather, the City utilizes salt brine to "pre-treat" our roadways to reduce the impact of snow and ice on the road surface. The goal of pre-treatment is to create a safer environment when travelling on our streets. Remember, if you don't have to, don't drive!
